

Invoices

Automate and streamline invoice approval workflow

Digital invoice workflow and management **streamlines and improves efficiency in a company** being compliant with document storage and availability.

Digitised documents are safely stored in the electronic archive.

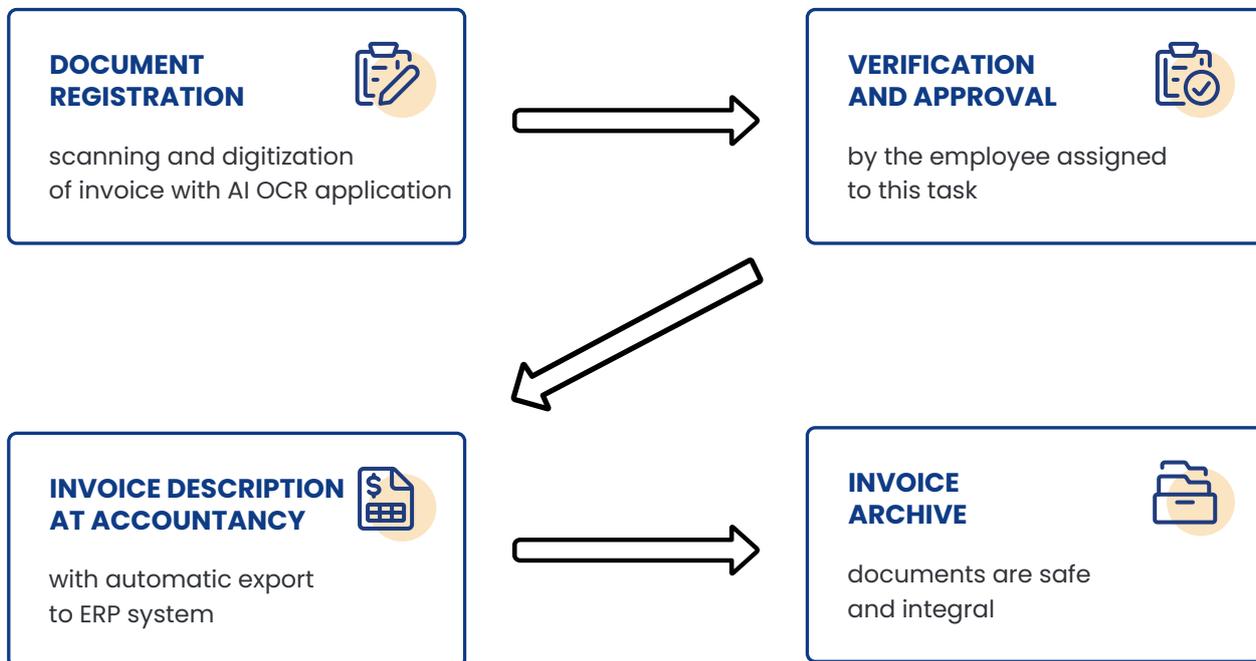

Invoice approval aligned to e-invoicing requirements means full control and time and money saved

What possibilities Invoice approval workflow offers?

- ✓ **OCR AI supported of an invoice** - an optic recognition of items and data from a document at the registration stage to the system
- ✓ swift registration of an invoice no matter the channel of its arrival
- ✓ **protection against double or more registrations of one document**
- ✓ **AI suggested cost allocation as well as verification of data and prevention against any deviations**
- ✓ *automatic verification of the contractor in VIES (VAT Information Exchange System)*
- ✓ **integration with national systems of e-invoicing (Polish KSeF)**
- ✓ history of cooperation with a contractor
- ✓ approval of invoices and their verification as well as adequate description in a streamlined workflow
- ✓ **full scalability of dictionaries and accounting dimensions**
- ✓ integration with other ERP systems with static API JSON

How Invoice application work?

Advantages of digital invoice processing
